 Basic Training Equipment

FOR  
BETTER  
PERFORMANCE

**LIVEPRO**

# Brand message

Today's fitness landscape is constantly evolving, with people returning to the gym in search of a variety of training experiences. The demand for strength and functional training continues to rise. There is a growing recognition that strength is the cornerstone of overall health, well-being, and longevity, and the key to better performance in sports and life.

In this day and age, fitness equipment holds a huge opportunity. A unique training space can be carved out with personalized, diverse-focused solutions. It also takes into account the unique needs of users and the unique design and development of the facilities to help improve performance and results.

At Livepro, we draw on more than 10 years of training expertise to design products that make you stronger. We also provide support for a variety of facilities to create the best possible training environment.

Our mission is to provide athletes with the best tools to help them create efficient training spaces that meet their needs and goals. Recently, we proudly introduced the Everset 25 Strength Training System, which combines what you've come to expect from a Livepro product: high quality, exquisite craftsmanship and superior performance. We pay attention to every detail to create an exceptional fitness experience, and the modular design of the system makes it highly adaptable—a solution that can evolve with our customers' needs.

This is our commitment and our vision for the future. Thank you for joining us in our pursuit of excellence and creating a stronger tomorrow together.

Livepro provides you with solid support on your training path and helps you show your better self.

# Company introduction

Livepro is located in Nantong, Jiangsu Province, with offices in Shanghai, Hamburg, Germany, and Los Angeles, USA. It has a 36,000 square meter factory area, a 10,000 square meter warehouse and a 3,000 square meter exhibition hall and showroom. Our large warehouse space allows us to hold more products in stock, resulting in faster delivery times for our customers. A fully functional product showroom showcasing many pieces from our Power Collection. In addition, this year we will be devoting a new 3,000-square-meter sports performance and training space. In addition to a lot of basic training equipment, there are also digital training equipment, equipped with force measurement systems, speed and agility systems. We also have a large seminar room where we can host training and seminars. If you would like to visit any of our showrooms, please let us know and we will be happy to arrange a visit for you.

# Company history

Founded in 2004, LIVEUP SPORTS is now an industry leading company, with a focus on fitness, rehab and sports products. Our company is dedicated to designing the best products, putting out new design and refreshing marketing campaigns. For 20 years, we have been present in 100 countries around the world. Through continuous design and innovation, we are now able to provide high-quality fitness equipment, professional display programs, and perfect coach training, and ultimately help customers create a good fitness experience space and great benefits.

## Founding stage

### 2004-2007

- 2004: LIVEUP SPORTS was founded, initially focusing on the sales of sporting goods.
- 2005: Launched the innovative material dumbbell, which quickly gained acceptance in the Southeast Asian market.
- 2007: The company expands in size, increases the number of employees, and strengthens the expansion of the European and American markets.

## Focus on fitness and branding

### 2008-2014

- 2008: The company launched a comprehensive range of fitness equipment for the personal and home training markets.
- 2009: The company began to implement an online sales strategy and establish an e-commerce platform.
- 2010: Launched a brand of personal training equipment Liveup, targeting the home and personal fitness market.

## Innovative branding and diversification

### 2015-2019

- 2015: Launched Livepro, a professional training brand for athletes and fitness enthusiasts.
- 2018: The company received several industry awards, confirming its leadership in the fitness equipment industry.
- 2019: Launch of GAIN[S], providing space storage and training options.

## Continuous expansion and social responsibility

### 2019-2022

- 2019: Expanded product line to include a full range of equipment and equipment from personal fitness, static stretching, professional training to space solutions.
- 2020: Establishment of a European marketing company in Hamburg and a network of partners in 100+ countries around the world to strengthen supply chain management.
- 2021: Launch of a sustainability program dedicated to environmentally friendly production and social responsibility projects.
- 2022: Launch of BLOOM, dedicated to improving physical and mental health through yoga, Pilates, and static training.
- 2022: 36,000 square meters of standardized production base.

## Looking to the future

### 2023 and beyond

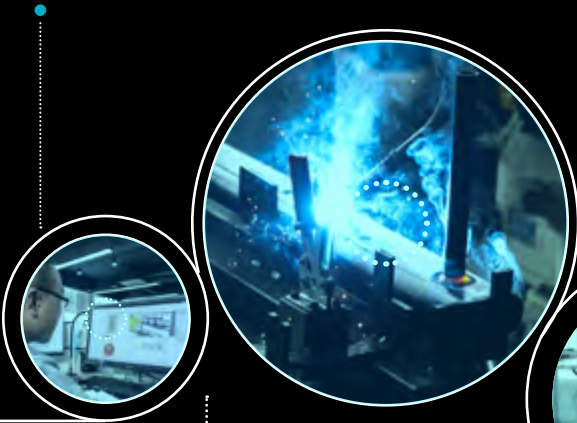

- 2023: 3,000 square meters of sports performance and performance will be completed training Experience Center.
- 2023: Rebranding Liveup with an emphasis on innovation and quality.
- Future Plans: Plans to further expand its global market.
- market share, while strengthening R&D investment to promote health innovation and development in the industry.

# Our working process

## 01/Product research and development

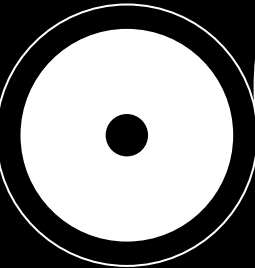

At Livepro, we develop our products from scratch. Our product development team turns ideas into drawings and then searches for the most suitable raw materials, production techniques, and manufacturing facilities. Before we start mass production of any designed product, we prototype and test it to ensure that it is reliable, durable, and safe. In addition, some of our products are tested and verified by NSCC, SGS, TUV-SUD, and other testing laboratories.®

## 03/ Quality inspection

### We can't just trust design

Although our products must go through a rigorous development process, we randomly inspect the main features of any product and match it with our drawings and datasheets to ensure compliance with our standards – from raw materials to finished products and their packaging.

## 02/ Manufacturing

Once we finalize a design, we move on to our production process. Heavy training tools need to be manufactured through high-quality processes such as laser cutting and robotic welding. We have our own workshop to meet the needs of our customers, including custom sizes or colors. We have a QC team who is responsible for all our mass production to ensure that every batch of products follows our high standards.

## 04/ Field test

Training tools need to be reliable! We provide equipment for state-of-the-art venues and professional athletes to ensure that it is truly exposed to intensive use. Feedback gathered from competitions and athletes is a surefire way to improve your product. Our goal is to provide reliable work to our customers Tool. Serving more than 3,000 training venues worldwide each year, this gives us the opportunity to put our equipment on the hands of more than 100,000 athletes.

## 05/ Order warehousing

### "Just-in-time delivery" is our motto!

The business is developing faster and faster, and we want to become a trusted one-stop procurement supplier for our customers. The Livepro product line contains more than 500 items and requires sufficient inventory on a daily basis. The China headquarters has a 1,0000 square meter warehouse in order to be able to quickly ship goods to customers of any size – 1 day for regular products and 15 days for customized products. We care about order processing. Our warehouse team receives confirmed orders on a daily basis. They then prepare all the packaging and use a computerized barcode and RFID order processing system to ensure that the order is 100% ordered. When the quantity of goods is large, we pack them on a pallet to reduce the potential damage when the goods are delivered.

## 06/ Delivery and installation

We have been a reliable partner to more than 3,000 fitness training spaces. We can ship our products all over the country, and we can also provide installation assistance services.

## 07/ After-sales service

### We are committed to being a partnership with our customers.

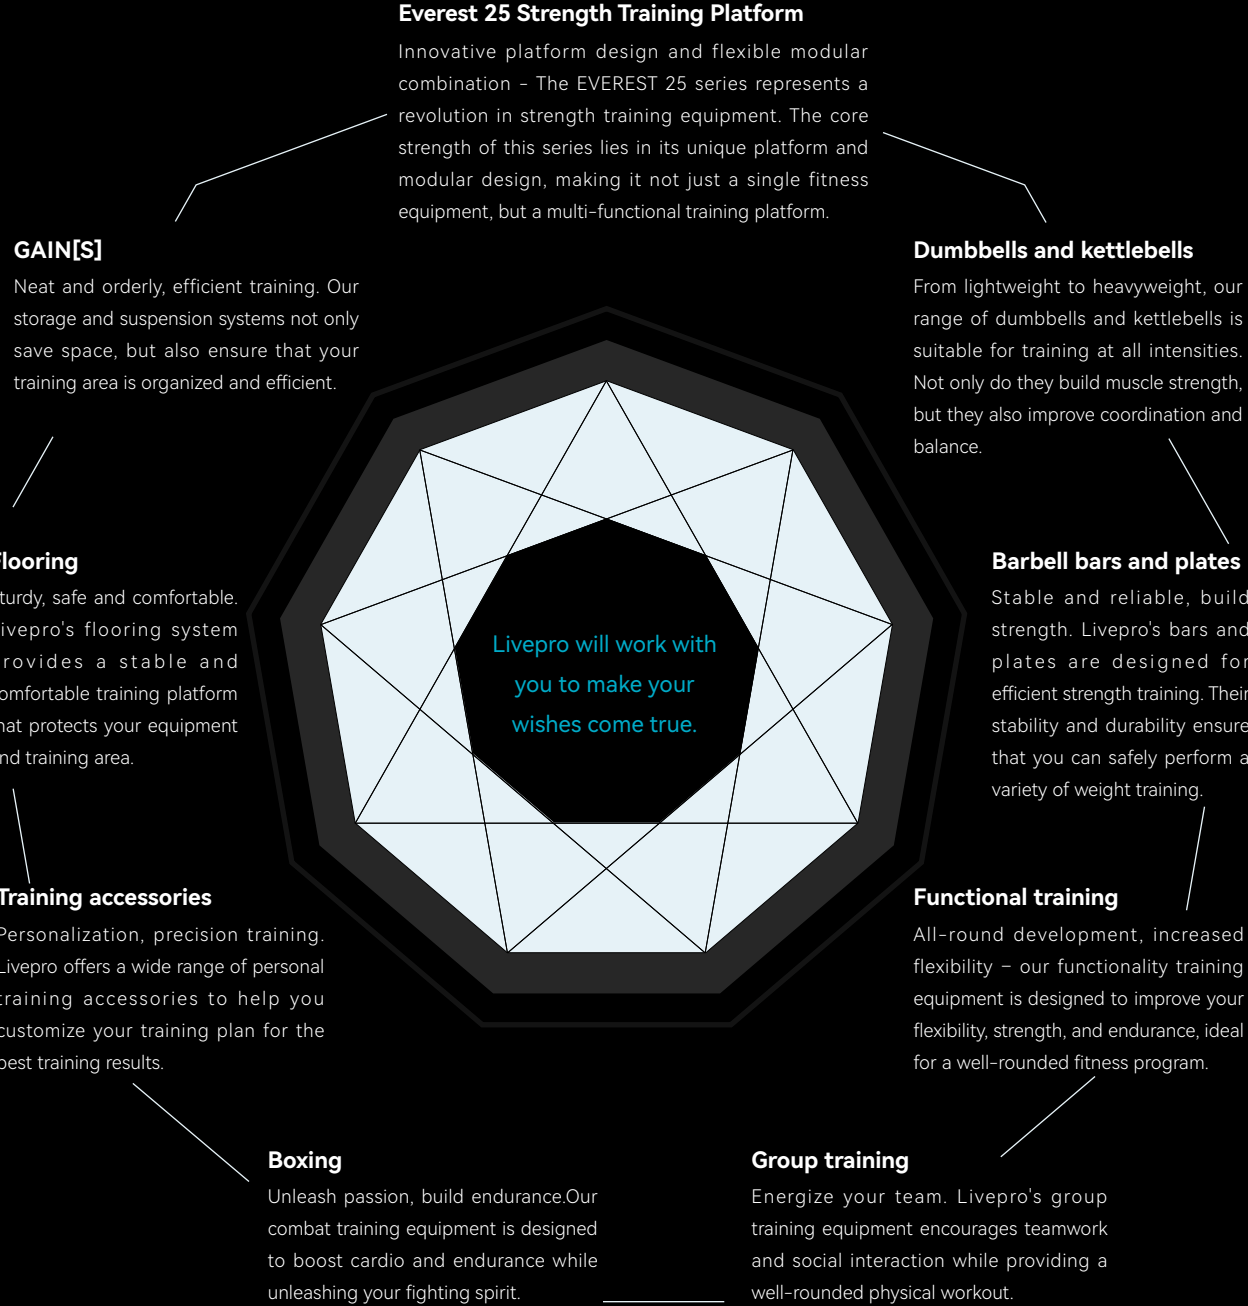

At Livepro, we care about our customers' needs, even after they have made a purchase. We can rely on a dedicated after-sales service team to answer all customer inquiries on a daily basis. We will never break our promise on the warranty of our products. Due to our large inventory of items and spare parts, we are able to immediately replace and repair any faulty products. In addition, after-sales service gives us the opportunity to collect any defects on any product and feed it back to our R&D department so that it can be corrected on the subsequent product.

# Products and solutions

Livepro is committed to providing you with comprehensive fitness solutions. Whether you're a fitness beginner or a professional athlete, our products have you covered.

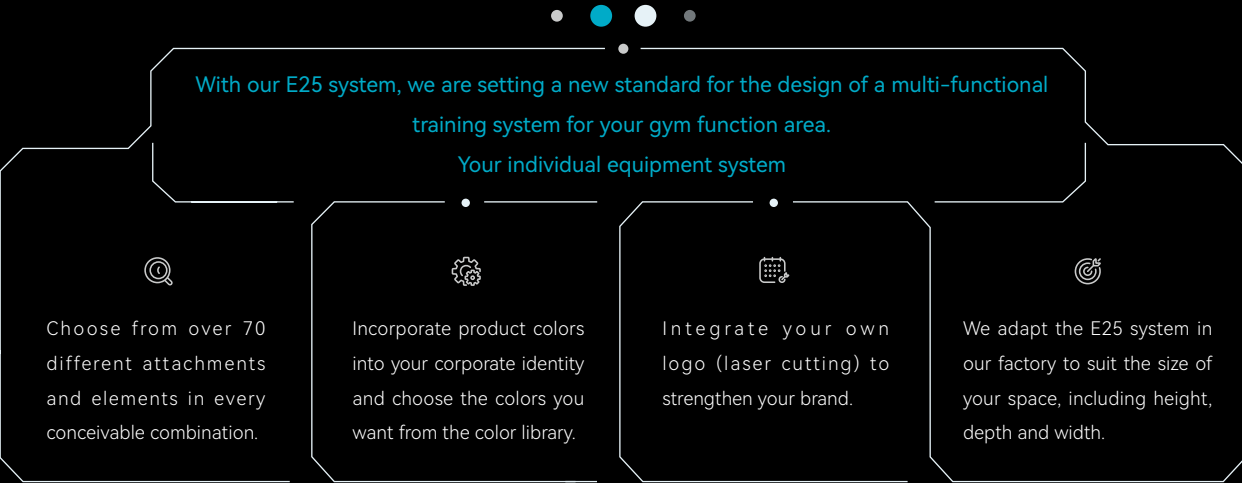

## Product matrix

## Solution

The Everest25 is an all-in-one solution in the smallest of spaces.

The all-new Everest 25 Peak Series offers a variety of training options in the smallest of spaces. Whether it's a fitness studio, competitive sports, sports rehabilitation, a hotel gym or your own home gym. With the numerous accessories of the E25 series, the power rack can be converted into a multi-purpose station that you can use for a variety of effective trainings.

Hangzhou - New Hall of Physical Potential

# NEXT GENERATION

Welcome to the world of training with Livepro. Here we're not just talking about fitness equipment, we're exploring a whole new way of life. A way to combine technology, innovation and human potential. The value of technology and professionalism is being widely recognized by the general public, and the future prospects of the sports and fitness industry are bright.

We are working with the next generation of young athletes and experts and coaches to shape the future through different avenues of creativity and innovation. At Livepro, we have adopted the concept of practical, comprehensive, and pioneering equipment construction. This not only reflects our persistent pursuit of innovation, but also reflects our deep understanding of the needs of users. Our equipment is designed to simulate and enhance actions in everyday life, thereby improving overall physical fitness and athletic performance. As "Michael Boyle", a pioneer in functional training, points out: "The key is to create training models that can find direct application in real life."

In this book, we'll take you on an in-depth look at Livepro's functional training devices and explore how you can use these tools to boost your training results. Whether you're a fitness beginner or an experienced athlete. We'll share training tips, science, and real-life stories to help you stay on your fitness journey.

# Weight bench

## The essence of future bench racks: Fully adjustable support surfaces.

The modern training bench is no longer just a traditional padded stool. The market now offers a variety of options such as seal row benches, hip/thrust boxes, GHDs (Glute Ham Developers), and more. Essentially, these are movable support surfaces designed to provide a comfortable height and angle while meeting diverse needs for adjustability, reinforcement, or assistance. We categorize this series as "weight bench ."

# Single leg stand

- The integrated single-leg squat roll pad quickly adjusts to six heights in the middle of the precision-cut extra-thick metal plate.
- The two side brackets have reinforcement and armrest design.

LP6085

Spec	
Material	Q235-A
Surface	Powder coating
Size	503*658*592mm
Protective pad	PU
Includes	Single leg stand*1
Weight	30kg

# Single leg squat

LP6070

- Made of high-quality steel pipe.
- There are a total of 13 height adjustment holes.
- Comfortable foot rest.

Spec	
Material	Steel
Weight	14.5kg
Size	530*580*580mm
Width of the bottom beam	130mm
Thickness of the bottom beam	8mm
Tube size	50*50*2mm
Adjustment holes	13 holes

# Weight flat bench

- Dimensions comply with IPF standards, simulating competition conditions during training.
- The E25 series features oversized branding plates, adding weight while maintaining facility design uniformity.

LP6080

Spec	
Material	Q235
Surface	Powder coating
Size	1291*604*440mm
Protective pad	50mm Foam
Includes	Flat bench*1
Weight	43.3kg

# Flat bench

LP6079

- A simple flat stool with wheels that can be stored upright.

Spec			
Material	Q235	Protective pad	PU
Surface	Powder coating	Includes	Flat bench*1
Size	1250*315*455mm	Weight	20kg

# Adjustable bench

LP6061

- This multi-functional exercise bench can provide you with a variety of exercises. High-quality fitness chair can guarantee your safety. Mechanical support, stable and safe, provide more stability and safety for your sports.Comprehensive equipment for full body exercise.It is very suitable for biceps, bench press, shoulder press, abdominal muscle training, leg exercise and so on.

Spec			
Material	Steel, Recycled cotton Sponge, PU	Adjustable height of the backrest	450-1180mm Angle: 10-90°
Weight	36kg	Adjustable height of seat cushion	440-600mm Angle: 0-8-16°
Flat size	1530*650*460-1370mm		

# Adjustable bench

NEW

LP6068

- 3 seat positions and 7 backrest positions offer versatile configurations.
- Simply pull the knob and lift the seat until it locks into your desired position.

Spec	
Material	Q235, SUS304
Surface	Powder coating Hard chrome
Size	1280*600*416mm
Plate pin diameter	Ø50mm
Protective pad	50mm Foam
Includes	Adjustable bench*1
Weight	40kg

# Adjustable bench

LP6078

- 7-level backrest adjustment: Each increment increases by 15° , ranging from 0° (flat) to 85° . The seat pad synchronizes with positions from horizontal to 20° tilt for full ergonomic support.
- Full-length, race-grade rubberized grip: Reinforced for secure handling, anti-slip performance, and bold aesthetics.
- Roll-pin locking mechanism : Seamlessly integrates with power rack systems, delivering competition-grade stability and precision.

Spec	
Material	Q235-A, SUS304, Polyethylene
Surface	Powder coating, Leather
Size	1358*565*445mm
Grip diameter	Ø32mm
Protective pad	5mm polyethylene
Compatibility	BenchConnect
Weight	60kg

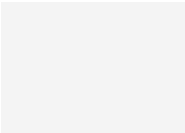

# Angle-adjustable GHD

- Space-saving versatility: Adjustable from 90° to 40° , instantly transforming into a hyperextension bench for on-demand use.
- Optional dual-action swing arms: Unlock modular loading options (e.g., plates, bands) and multi-functional configurations.
- 3D adjustability (front/ rear + height): Engineered to adapt to biomechanical variances across users.

LP6081

Spec	
Material	Q235-A
Surface	Black matte Fine white sand blasting
Size	1645*1235*932mm
Plate pin diameter	Ø50mm
Protective pad	1mm PVC
Includes	GHD*1 Swing arm*1
Weight	150kg

## Reverse hyper GHD

- The adjustable leg support arm offers a wide range of motion, with excellent ergonomic adaptability, allowing quick foot pedal adjustment to your desired position.
- The counterweight arm can be used both independently and in parallel.

Spec			
Material	Q235	Protective pad	115mm Foam
Surface	Powder coating Stainless steel, Galvanized	Weight	260kg
Size	1645*1235*932mm	Includes	GHD*1 Swing arm*1
Plate pin diameter	Ø50mm		

LP6084

## Pure GHD

- Focuses on hip joint training.
- The hydraulic-adjustable foot support arm allows quick and effortless adjustments via a pull-pin mechanism.

Spec			
Material	Q235	Protective pad	150mm Foam
Surface	Powder coating Stainless steel, Galvanized	Weight	265kg
Size	1916*1391*961mm	Includes	GHD*1 Anchor pin*2
Plate pin diameter	Ø50mm		

LP6083

# Multifunctional stretch trainer

- The seat height has 6 gears to adjust. The height range is 450-600mm.
- Comfortable leather seats, increase experience, and the tail is equipped with two pulleys for easy movement.

LP8514

Spec	
Material	Steel
Surface	Q235
Land size	1500*800mm
Protective pad	PU
Includes	Stretch trainer*1
Weight	49kg

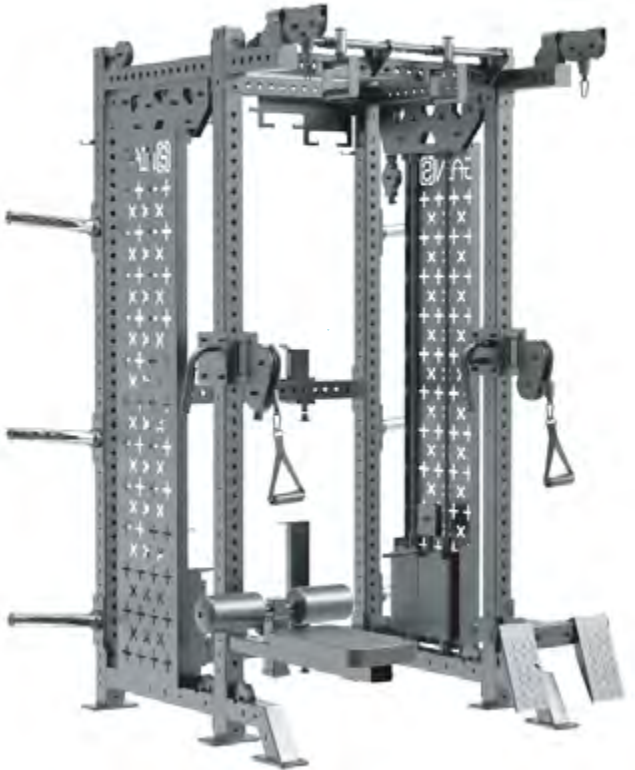

## Livepro selectorized rack

- This rack is made of Q235 high quality steel that is laser cut with seamless welding technology making it more stable and durable.
- Each piece is exposed to special sandblasting and a chemical cleaning process. Then, it is painted to increase corrosion resistance, thus will not easily rust.
- The hook can be adjusted freely.
- Multiple storage positions.
- The rack has 75x75x3mm pipes, can bear an overall weight of 455kg, and is extremely load bearing.
- This rack comes with a counterweight that can be freely adjusted.

Spec	
Material	Steel, PP
Weight	455kg
Color	Black
Tube size	75*75*3mm
Product size	1945*1786*2406mm

Contain	
<ul style="list-style-type: none"><li>• 1 pair of safety frames</li><li>• 1 pair of hooks</li><li>• 6 bells hanging rod</li><li>• 2 barbell bar racks</li><li>• 1 set of rowing pedals</li><li>• 1 set of high drop down cushion</li><li>• 1 set of adjustable pull-up frame</li><li>• 2 simple pull handles</li><li>• 2 grip power ball</li><li>• Single side 100KG select iron</li></ul>	

LP6004

# Dumbbell and kettlebell

## Maintenance-free, one-piece solid process

- The solid steel handle is hydraulically pressed with a solid steel head and fully welded for maximum strength.
- The radius of each plug is chamfered on the outside to replace the impact force between the plug and the polyurethane coating for longer impact resistance.

## Display your logo on high-quality dumbbells

- This service not only enhances the personalized character of the equipment, but also enhances the brand image of your facility, making it more professional and unique.

# Classic plate dumbbells

LP8071

- Steel core with stackable urethane-coated plates for adjustable weight. TPU layer provides shock absorption, quietness, and rust-proof protection. Non-slip grip ensures safety during workouts. Modular design saves space, ideal for versatile strength training at home or gym.

Spec

# Plate and bar

## Military-grade precision machining, extraordinary precision and stability

The Livepro competition-grade barbell bar is precisely controlled to within a maximum tolerance of 0.03mm, with a weight error of no more than 10g, and is equipped with high-precision bearings and copper sleeves.This delicate process results in minimal clearance between the grip and the sleeve, ensuring that the entire barbell bar is tightly bonded and perfectly integrated. This is not only for athletes, it also greatly improves the safety and quietness of use, making your training more focused and efficient.

NEW

## Powelifting competition plate

## Livepro elite black rubber bumper plate

- Made entirely of rubber for quiet durability and low rebound.
- Patented groove design on the surface facilitates easy gripping of weight plates.

Spec			
Weight	5/10/15/20/25kg	Thickness	28/47/66/78/91mm
Material	Pole holes stainless steel Synthetic rubber high temperature vulcanization	Hardness	92°
		Falling test	2.2 meters falling 22,000 times without damage
Diameter	Pore diameter50.5mm Outer diameter450mm	Weight tolerance	±1%

\*Passed the physical test of national body certification / Passed TUV Rheinland chemical laboratory testing and certification

Livepro elite colored rubber bumper plate

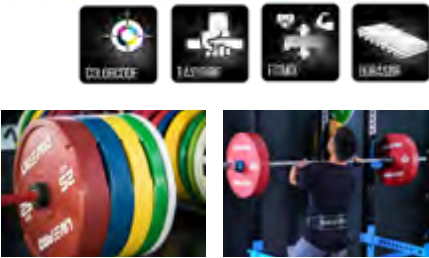

LP8332

- One-piece molding.
- The unique edge structure is not only beautiful but more convenient to grasp.

Pulling block

LP6010

- Made of solid wood multi-layer board.
- The top is covered with high-density rubber, which increases non-slip performance.
- Adjust different heights according to demand.

Spec	
Material	Wooden plate frame Rubber cover
Size	600*450*75/125/175mm
Weight	39kg
Wooden board thickness	18mm

JERK box

LP8816

- Made of high-quality multi-layer board, which allows it to carry huge weight.
- Double-layer structure and powerful internal support frames, scientific inlaid layout is inside, which can be stacked safely.
- Putting design, dual stability. Hand-grabbed the hole design, which is convenient for grasping.
- Belly design on both sides to prevent barbells from rolling down on the product.

Spec	
Material	Wood
Size	910*510*60/150/300/380mm
Weight	168kg
Wooden board thickness	20mm

Barbell cushion

LP8320

- High-density regeneration cotton fill.
- Hand-lifting design makes it convenient.
- A non-slip fabric at the bottom to enhance the stability of the barbell platform.

Spec	
Material	Regenerative cotton fill The surface layer is PVC
Weight	11kg

# Functional training

## Science empowers, unleashing athletic potential

This chapter delves into the field of functional training, presenting professional-grade solutions tailored to your needs. We have curated a selection of highly effective and practical functional training equipment, including but not limited to:

Suspension Training Systems: Utilize bodyweight resistance for multi-planar, multi-angle training, enhancing strength, stability, and flexibility.

Medicine Balls: Combine explosive power training with functional movement patterns to boost core strength, coordination, and athletic performance.

Balance Training Equipment: Challenge equilibrium, improve proprioception and postural control, and reduce the risk of sports injuries.

Agility Training Tools: Enhance reaction speed, agility, and coordination for sport-specific conditioning.

We are committed to providing professional functional training products and services for fitness facilities, sports teams, and fitness enthusiasts. Our solutions help you design scientifically optimized training programs, improve workout efficiency, unlock athletic potential, and achieve your fitness goals.

# Square training barrel

LP8133

- The square tube design will not roll, which is convenient for storage.
- Ecological engineering handle design is easy to grasp.

Functional ball trainer

- Enhance grip strength: The functional training basketball is specially designed to enhance finger and hand grip strength, helping athletes improve their grip strength through its unique materials and structure.
- Increase confidence: The "Ball Strong" concept is integrated into the design to enable athletes to increase their confidence in ball control and passing when using the basketball.
- Reduce turnovers: By improving hand strength and ball control, basketball helps reduce turnovers in games and training, especially in high-stress situations.
- Restore scenes from actual basketball combat. Perfectly combines real basketball ball grip with special basketball performance. Train with the most essential attitude of basketball and let training return to the game!

Livepro sled

- The Livepro sled is a top-of-the-line training equipment that is carefully designed for strength and endurance training. It inherits the high standard of the EVEREST 25 series, with 75\*75 tubing and 26 aperture system, which is compatible with a variety of accessories of the EVEREST 25. The sled not only shows innovation in materials and construction, but also offers unprecedented flexibility and convenience in terms of functionality. Ideal for athletes and fitness enthusiasts looking for the ultimate training results.

# Recovery and regeneration

## Steady support stretching and activation exercises

Livepro training mats, made of special foam material, combined with non-slip, durable design, provide stable support for stretching and active training, protect the body, suitable for a variety of training formats, ideal for fitness enthusiasts.

## Balance trainer LP8216

- Add three dimensions to each action, make the exercise effect better, grip design, and increase the possibility of multiple exercise.
- Surface texture design, increase the friction coefficient, effectively non -slip.

Spec	
Material	PVC surface TPE bottom, Plastic handle
Size	1030*485*250mm
Weight	10.2kg

## Balance trainer LP8211

- The spherical texture and the base cushion ring, at the same time increase the non -slip properties.
- Durable spherical and wide bases can bear the maximum of 300kg.

Spec	
Material	PVC, PP
Size	615*220mm
Weight	5.5kg

## Anti-burst core ball LP8201

- The edge of the sphere surface is not only beautiful, but also provides outstanding grip.
- The foam design of the sphere, after being pierced, slowly deflates without blasting.

# Team and group training

## More than just a training pedal

Designed for group classes and gyms, it is equipped with storage space for gym equipment such as dumbbells, barbells, elastic bands, etc., making the fitness pedal not only a workout platform, but also a neat storage solution.

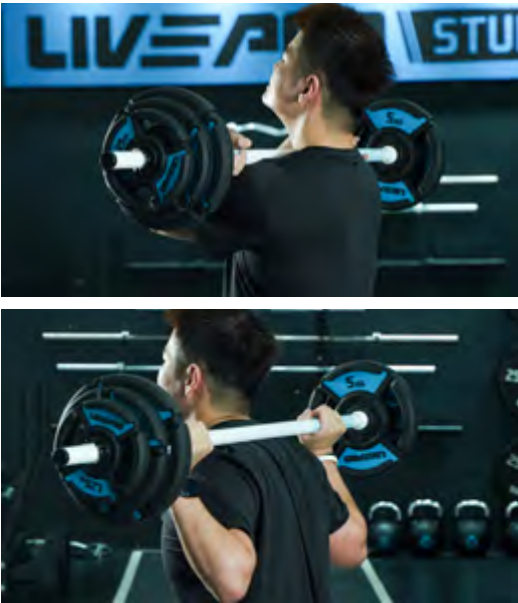

# Urethane barbell set

- High -quality polyurethane material, heat -resistant, wear -resistant, and does not hurt the ground and surrounding products.
- Blue printing at the grip to increase the grip of the hand.
- The double -hole design of the bell, which is easy to grasp when installing and disassembling.

LP8037

Spec	
Includes	Bar*1/Barbell collar*2/ Plates 1.25kg*2, 2.5kg*2, 5kg*2
Plate material	Inner: iron, Cover: polyurethane
Total weight	20kg
Bar length	1420mm
Handle diamete	30mm
Sleeve length	220mm
Surface treatment of handle	Electrostatic powder coating Intelligent printing of patterns

## Rubber barbell set

- Using a dynamic color scheme to quickly identify weight.
- Anti-slip grip design.

Spec	
20kg Includes	Bar*1/Barbell collar*2/ Plates 1.25kg*2, 2.5kg*2, 5kg*2

Plate material	Inner: iron, Cover: rubber
Total weigh	20kg/40kg
Bar length	Color bar 1400mm; Foam bar 1300mm
Handle diameter	25mm

## Classic barbell set

LP8035

- Plating treatment on the surface of the pole, not easy to rust on corrosion.
- 1.5mm Knurl, not only beautiful, but also increase hand grip and improve anti-slip.

Spec			
20kg Includes	Bar*1/Barbell collar*2/ Plates 1.25kg*2, 2.5kg*2, 5kg*2	Handle diameter	28mm
40kg Includes	Bar*1/Barbell collar*2/ Plates 1.25kg*2, 2.5kg*2, 5kg*2,10kg*2	Total weight	20kg/40kg
Plate material	Inner: solid mixture, Cover:PE	Bar length	1400mm (500+500+400mm)

# Multi-function deck

LP8246

- Multi-function pedal brings more creative thinking to pedal training courses. A pedal can be used in multiple uses. You can do pedal exercises, push-ups, dumbbell benches. It can also be equipped with tensilers for strength training and so on. Folding feet can be used to increase or decrease the height of the pedal. Adjust the differential angles of differential feet and experience different ways of exercise. A non-slip pad, the non-slip surface layer adds the stability of the pedal at the same time, making exercise safer and more professional.

Spec	
Size	1215*345*200-350mm
High	200/350mm
Back angle selection	0-90°
Weight	12.1kg
Maximum load	150kg

- Storage**  
There is a perfect storage space here. You can place resistance bands, etc. to create a full-time training station.

- Intelligent grip**  
The texture of the pedal plane is different, which can meet the needs of hands or feet in specific areas.

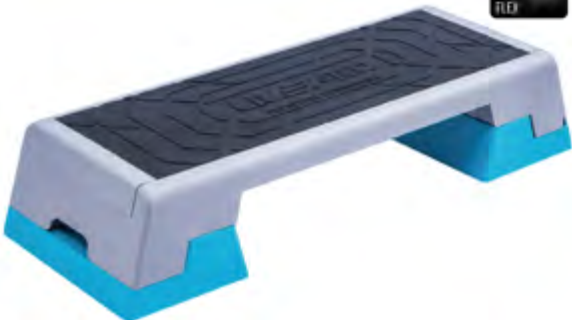

- Any angle**  
The angle of the pedal back is adjusted through the hydraulic rod, which can be adjusted to any angle.

## Aerobic fitness step

LP8245

- PP board has good mechanical properties, strong impact resistance, and long-term use is not easy to damage.
- The surface TPE has a strong friction coefficient, a beautiful texture design, and increases the non-slip performance of the pedal.

Spec	
Size	1010*375*150/200/250mm
Height selection	150/200/250mm
Weight	7.5kg
Maximum load	150kg

# Livepro step

LP8244

- Livepro step exercises can be performed with stacked steps. Use a mini step foot to improve the height of more training. You can also set up a tilting angle for pedal practice. The stacked pedal is diverse and can be easily switched to the configuration during the training process.
- Use high-quality TPE material. The design of the surface pattern and the bottom pads are not only soft, but also can ensure solidarity and stability. Even if you move quickly, the pedal will not displacement.

Spec	
Material	TPE, PP
Weight	9.3kg
Size	1080*430*105-158mm
Mini step size	430*430*98mm
Maximum load	150kg

- Target training area**  
The precise target area can guide the correct position of the hands and feet to obtain a variety of challenges.

- Hot welding**  
The platform is not simply pasted on the surface of the pedal, but is more durable and non-slip through a stronger heat welding connection.

- Lock the connector**  
Low the blue machine into a line, and then press hard to lock the mini pedal foot and the pedal platform.

## Mini fitness step

LP8244-B-BU

- Eight locks on the surface, four buckles at the bottom.
- Infinite overlap, convenient assembly, and improve infinite fun.

Spec	
Size	430*430*98mm
Weight	1.73kg
Maximum load	100kg

PRO-box 2.0

LP8863-E

- Hydraulic rods are adjusted at any back of the back.
- Wheel design is very convenient to move. It can be locked safely when not moving.

Spec	
Structure	30*30*2.5mm steel pipe
Manufacturing	MIG welding, Standard bolt
Land size	1396*420mm

Weight	6.6kg	Trampoline diameter	1000mm
Round tube diameter	28mm	Bullet width	750mm
Supporting foot diameter	25mm	Number of bombs	Not less than 80,000 times

# Personal training accessories

## Comprehensively improve the training effect and experience

These provide a comprehensive and efficient set of training tools for fitness enthusiasts and professional athletes. It solves the diverse training challenges under different training environments and needs. With these accessories, users can train effectively from anywhere, at any time, to achieve better fitness results.

## Knee wraps LP8724

- High-strength polyester & latex construction delivers robust support for knee protection during squats, deadlifts, and high-intensity training.
- Elastic latex material conforms to knee contours for a snug yet comfortable fit, ensuring unrestricted movement.
- Breathable polyester fabric provides lightweight ventilation for extended wear, with durable wear-resistance for versatile training scenarios.

Spec	
Material	Polyester, Latex
Weight	375g
Size	1700*80mm

## Wrist wraps LP8723

- Silicone grip strips enhance friction to secure barbells/dumbbells for max-weight breakthroughs.
- Military-grade polyester resists tearing/abrasion, enduring high-intensity training for years.
- Versatile assist for deadlifts, pull-ups, and rope climbs to boost strength/endurance.

Spec	
Material	Polyester, Cotton, Silicone, SBR
Weight	60g
Size	280*50mm

## Elbow wraps LP8725

- High-strength polyester & latex construction delivers reinforced elbow support for squats, deadlifts, and heavy training.
- Breathable polyester ensures all-day ventilation with tear-resistant durability for cross-training versatility.

# Boxing gear

## Sliding sandbag track system

Tracks are the ideal solution for manipulating sandbags between the gym’s storage room and the available space. The track can be fixed to the ground, walls, and top surfaces, and can also be turned 90 degrees, which saves the hard work of moving sandbags and saves and utilizes space when the sandbags are not in use.

## Aqua boxing bag

LP8606

- Imitate the real touch of the human body.
- Effectively absorb fist hitting force to protect the joints of the hand.
- High-quality PVC materials, resistance to strike.
- Stainless steel with width unload fixation.
- Easy to store and carry.

Spec	
Material	PVC
Weight	4kg
Maximum capacity	30kg

Steel size	50*50*3mm

## Floor mount

- With boxing sandbags and boxing water bottle, it is mainly used to conduct hard training.
- When you worry about how to configure the boxing area or hang a sandbag and water bag without a place. Our LP6302 series boxing track system solves this problem well.

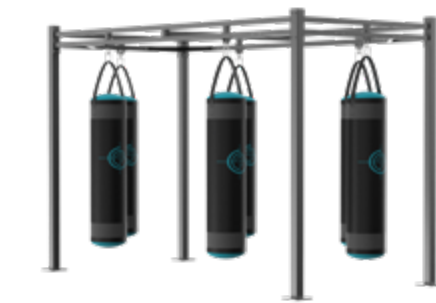

Spec	
Material	Carbon steel
Land size	6050*1041*2511mm
Product size	100*100*2.5mm 50*80*3mm

## Boxing bag rack

- Freely customized size according to the size of the venue.
- Holds up to 6 people for boxing training at the same time.

Spec	
Material	Carbon steel
Land size	3690*1950*2500mm
Steel size	80*80*3mm

## Boxing bag rack

- Use with boxing sandbags and water bottle for boxing power training.
- When you are worried that there are no sandbags and water bags in the venue, the livepro boxing rack can solve this problem well.
- Can accommodate three people for boxing training at the same time.
- Made of pure steel, sturdy and durable, the bottom triangle structure, which can be stable during the training process.

Spec	
Material	Carbon steel
Land size	3700*1000*2610mm
Steel size	100*200*4mm 100*100*3mm

# Storage rack

## "Retrieval, usage, storage" – an integrated and indivisible storage system

For years, the fitness industry has witnessed continuous innovation in training equipment while storage solutions remained overlooked – people excel at initiating new things but often neglect proper completion. Yet the process of "retrieval, usage, storage" constitutes an integral and inseparable training ecosystem. We've fundamentally reengineered our shelving system, creating versatile shelving panels that seamlessly adapt to all rack configurations including single-post freestanding, single-post wall-mounted, double-post freestanding and panel-mounted systems. Each rack design serves specific spatial requirements while each panel variation accommodates different storage needs, together forming a truly intelligent storage solution for modern training facilities.

Lan qi storage rack

NEW

LP8869

- Lan Qi weapon rack—A traditional Chinese weapon storage rack. It can be used for both storage and display, and is easy to take out.

Spec	
Material	Q235-A
Surface	Powder coating
Size	1775/2275/2775*600*265mm
Protective pad	Polypropylene sleeve
Includes	Lan qi storage rack*1
Weight	25/28/31kg

Vertical bar storage

LP8867

- Provides adequate strength and protection during barbell sliding. Rubber layer cushioning on top and embedded stainless steel ring provides edge strength.
- The compact design is suitable for most usage scenarios.

Spec			
Material	Q235, SUS304, Rubber	Protective pad	3mm rubber
Surface	Natural wood with varnish	Compatibility	Ø50mm
Size	550*550*205mm	Includes	Storage rack*1
Weight	40kg		

Dumbbell rack

LP8911

- The new design of the plate dumbbell rack, the newest member of our modular family, offers a solution for individualized, compact storage space planning.
- Special rubber dumbbell saddle.

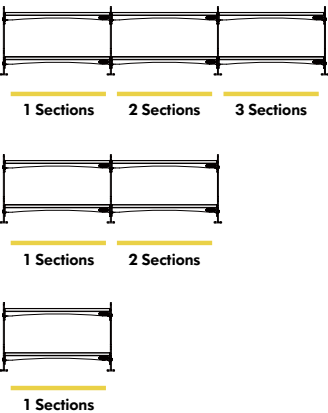

Spec			
Material	Q235-A	Weight	70kg
Surface	Powder coating	Includes	Dumbbell rack*1
Size	1160*620*690mm		

Kettlebell rack

LP8912

- The newly designed plate kettlebell rack is the newest member of our modular family. It offers a solution in terms of intensive storage space planning in line with individualization.
- The 3mm cushioning is more than adequate for weight storage.

Spec			
Material	Q235-A	Weight	78Kg
Surface	Powder coating	Includes	Kettlebell rack*1
Size	1160*620*690mm		

Weightlifting plate rack

LP8882

- The design facilitates the systematic storage of plates. This is because the dimensions of each slot are specifically designed to accommodate plates pieces of different widths. Ensures that the plates are securely stored in the proper location.
- The storage unit can accommodate a complete set of weight plates including two 25kg plates, three 20kg plates, four 15kg plates, four 10kg plates, one pair each of plates ranging from 5kg down to 0.5kg, plus two clamp collars - keeping all your weightlifting equipment neatly organized for efficient training setup.

Spec			
Material	Q235-A	Weight	26kg
Surface	Black matte	Includes	Weightlifting plate rack*1
Size	1281*450*263mm		

DB & KB rack

LP8910

- Storage units can be constructed as self-contained units to help divide the space. Storage space can be accessed from both sides via the Hole Plate Attachment for storing training tools, replacement plate appliances, etc.
- Storage racks can be placed against a wall to maximize floor space according to facility needs.

Spec			
Material	Q235-A	Weight	366kg
Surface	Powder coating	Compatibility	Single pillar/Twin-pillar/Plate
Size	4415*820*1140mm	Includes	DB & KB rack*1

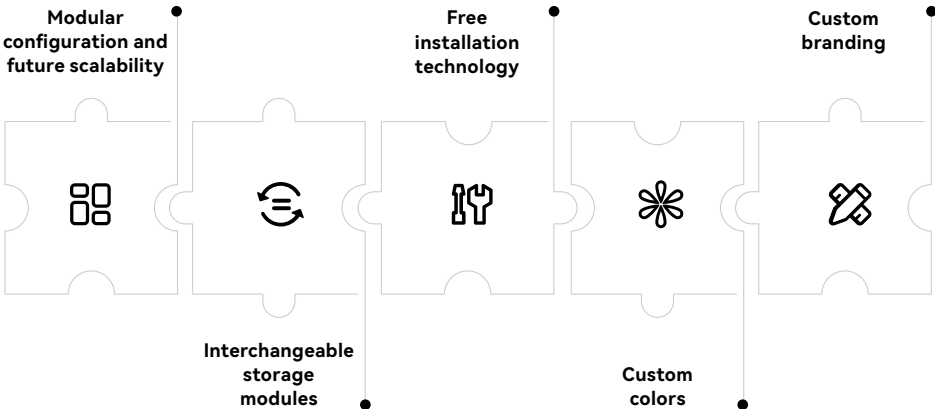

# Storage system [GAINS]

GAINS is LIVEPRO'S new storage solution brand. Nowadays, sports spaces come in various sizes and designs, but there is a common goal - to effectively maximize space utilization and exercise functions. Equipment placement, safety, and space saving are important. The GAIN [S] system can reserve storage space while activating other systems. The Gain [S] storage and suspension system adopts a modular design, which is very suitable for use in group studios, dynamic training areas, and private education stretching areas.

## Peculiarity

## Advantage

### Higher strength

The integration of each frame and storage rack is carefully designed. High quality steel is selected, and automobile painting process is adopted, which is highly rustproof and corrosion resistant. It can provide significant value in terms of function, finish, or service life.

### Easy to install

Free installation, unrestricted connection. It supports rapid transition from one sports device to another.

### Intelligent storage

Each storage bay is optimized to accommodate larger devices with a smaller footprint. The storage rack allows for more training extensions and has gained more training functionality.

# Weightlifting platform

## Discover your true strength – Find your perfect lifting platform now!

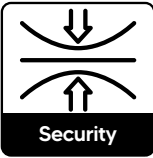

Livepro offers a diverse range of lifting platforms tailored to your needs. Whether you're a professional athlete or a fitness enthusiast, we have the perfect solution for you. Explore our product features to discover the ideal platform that matches your training environment and personal goals. Together, let's build a safe, high-performance lifting experience.

## Why Select Livepro Weightlifting Platform

When you choose a Livepro weightlifting platform, you get a top-of-the-line training partner that combines performance, safety, sound damping, and durability. Our weightlifting platforms are built with extra strong hardwoods, ensuring stability and long-lasting durability. It is also equipped with a steady-grip anti-slip coating that provides excellent grip and safety. In addition, its advanced sound-dampening and shock-absorbing design effectively reduces noise and vibration during training, creating a more focused and peaceful training environment for you.

Excellent performance

Security

Silencing and damping

Surface durability

HardFlex Wood

Surgecoating grip

# Excellent performance

The combination of these three layers not only enhances the functionality of the lifting platform, but also ensures the safety and comfort of the athletes. At the same time, it creates a quieter and more professional training environment for the gym or home fitness area.

1

## Wear-resistant and shockproof layer

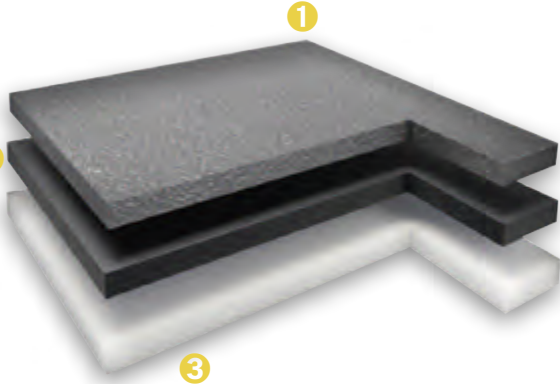

This layer is made of a single piece of rubber material, which is extremely resistant to abrasion and shocks. It provides a sturdy foundation for the entire weight bench, ensuring that the platform remains stable as the weight falls, while providing long-term durability.

2

## Energy absorbing layer

Made of high-density vulcanized rubber, this layer is specifically designed to absorb the impact of the bell when it hits the flooring. It effectively reduces the rebound of the bell plates, which reduces the impact on the ground while protecting the athlete from accidental injury.

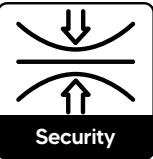

2

3

## Sound-dampening layer

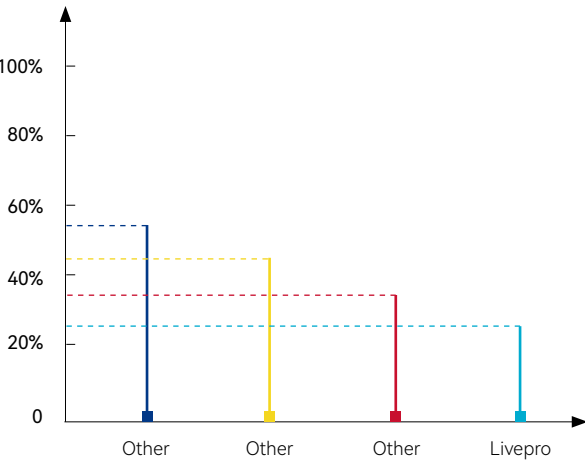

Made of a special foam material, it is designed to cushion the impact and impact sound generated when the bell hits the ground. Not only does it improve training comfort, but it also reduces noise, making the weight bench suitable for gyms or home fitness areas that require a quiet environment.

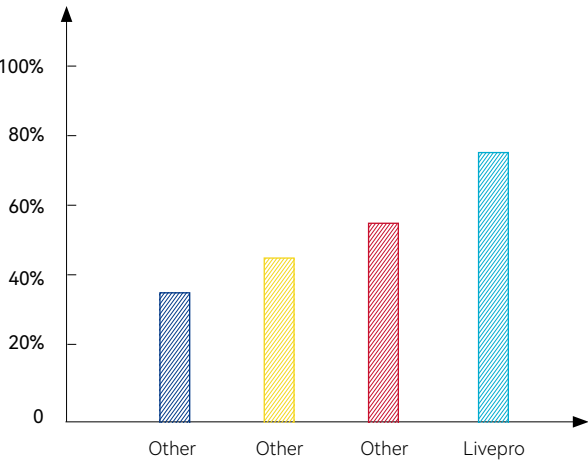

# Security

At Livepro, we know that the core of weight training is not just strength, it's safety. That's why our carefully designed weight benches, with their superior energy absorption and reduced disc rebound, provide unprecedented safety for your training.

Ringblade rebound rate (lower means better performance)

Energy absorption rate (higher means better absorption)

# Silencing and damping

The Livepro weight bench features a three-layer high-efficiency shock-absorbing structure that significantly reduces noise and ground impact, protecting athletes and the ground, providing a safer and quieter training environment.

Shock absorption and sound reduction rate

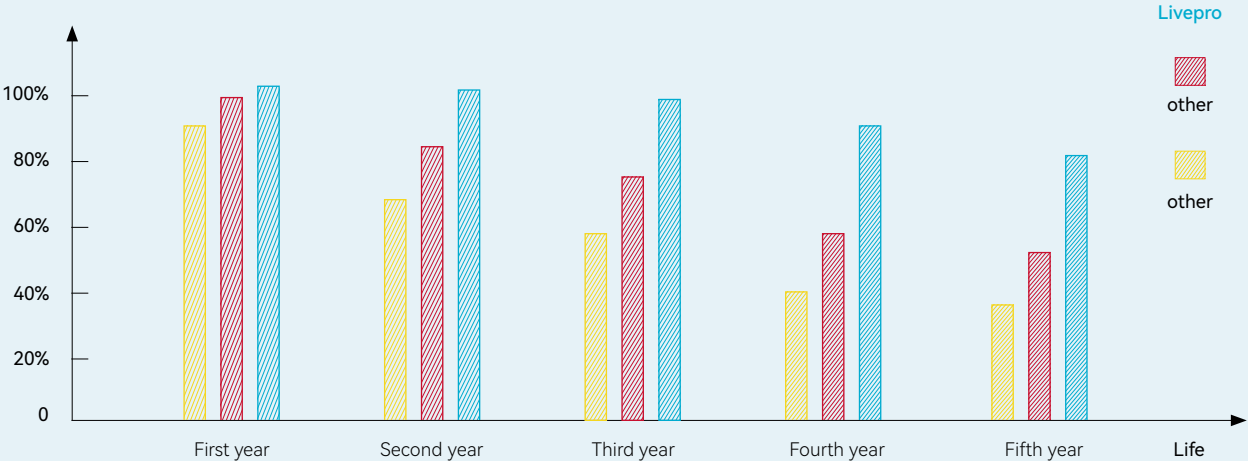

Comparison chart of the performance of LIVEPRO and other brands of products, shock absorption and sound reduction rate

# Surface durability

Livepro products are made of high-quality vulcanized rubber materials, which guarantee an efficient service life of more than 5 years, even in high-use environments.

Performance retention

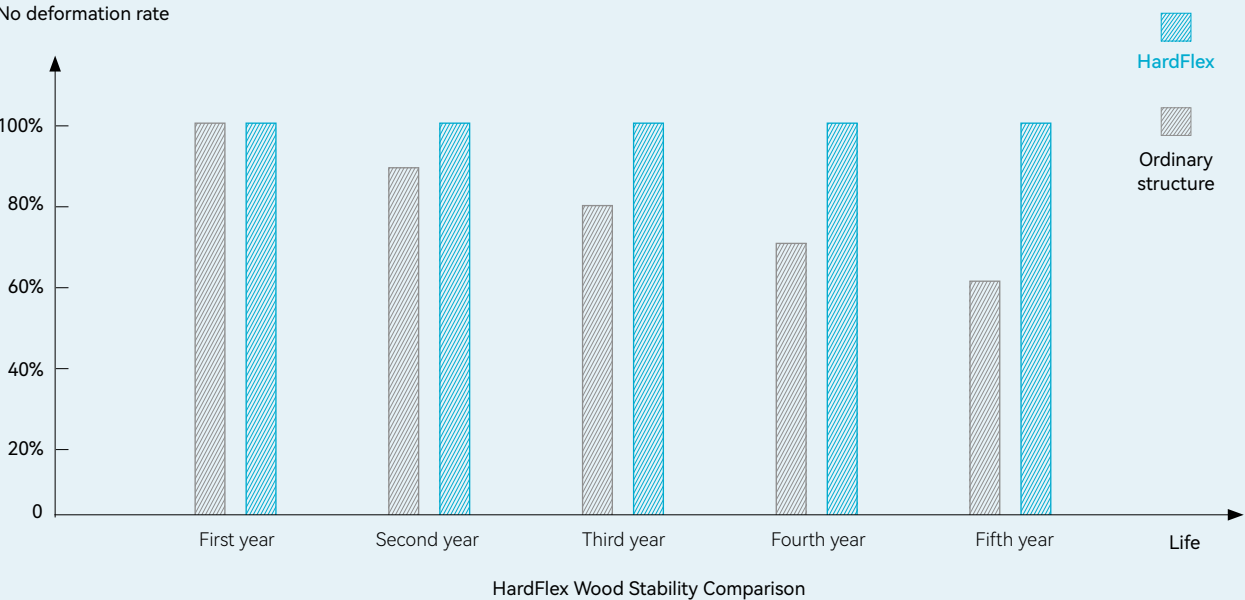

Comparison chart of the performance retention rate of Livepro and other brands

## HardFlex Wood

HardFlex Wood combines wood and steel to form an ultra-strong structure. It has good stability and can maintain its shape without deformation after long-term use, providing users with a solid and reliable training foundation.

## Surgecoating grip

This coating not only prevents the planks from slipping due to sweat or moisture, but also provides extra grip. Whether barefoot or wearing training shoes, SureGrip Coating provides stable support for greater peace of mind during high-intensity training such as weightlifting.

## Standard independent weight lifting platform

LP6230

- The Livepro standard weight lifting platform is designed for general strength training and daily fitness activities. Its 50mm thickness provides a strong and stable foundation for basic strength training such as barbell lifting, squats, deadlifts, etc., as well as for daily fitness activities.

Spec

# Embedded weightlifting platform

The Livepro Embedded Weightlifting Platform is an innovative design that can be seamlessly embedded into the LIVEPRO's half-frame and full-frame, providing a versatile, space-saving training solution for fitness enthusiasts and professional athletes.

## 1 Wooden plank mortise and tenon occlusal structure

Livepro's embedded weight lifting platform features a mortise and tenon articulating structure that ensures that the two planks fit snugly for a seamless, secure lifting experience. This design not only enhances the stability and durability of the overall structure, but also simplifies the installation process. Its exquisite exterior design is both beautiful and practical, suitable for a variety of fitness environments, providing users with a safe and reliable weightlifting experience.

## 2 Seamless integration of frameworks

Livepro's weight lifting platform is uniquely designed for seamless integration with strength training racks. This innovative connection method ensures that the platform and the training rack are closely and seamlessly connected, forming a whole and providing a more stable and safe training environment. This design not only optimizes the use of space, but also enhances the durability and aesthetics of the equipment, resulting in a smoother and more efficient training experience for the user.

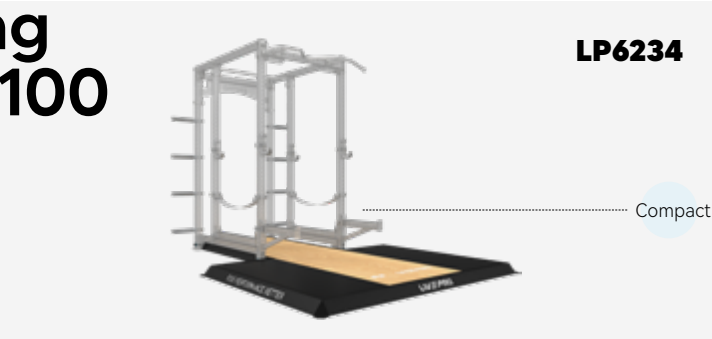

## 3 L-Anchor Stabilization System

The L-Anchor Stabilization System is an innovative technology that Livepro has carefully designed for its embedded weight lifting platform. By embedding an L-shaped steel structure in the wooden backplate, the system is designed to improve the stability and durability of the entire lifting platform. At the same time, it ensures the convenience and safety of users when lifting or handling heavy objects.

# Insert weightlifting platform full rack100

- "Full-rack embedded lifting platform" delivers a fully enclosed training zone, engineered for professional weightlifting requiring large-area stability support.

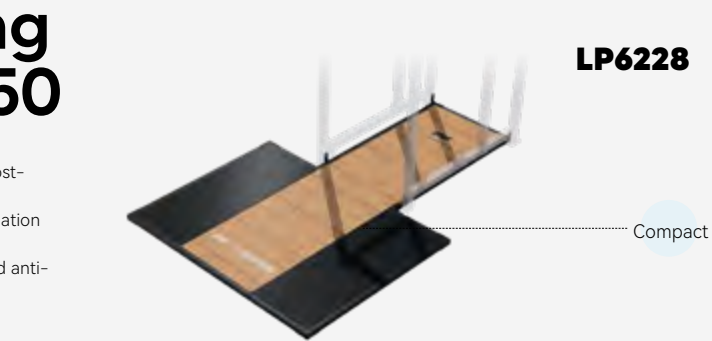

Spec	
Material	Q235 steel, Recycled cotton, Rubber Wood boards
Surface	Powder coating
Outline frame	Tapered
Frame size	1800*2400mm
Inner frame size	1840*1000mm
Thickness	100mm
Contain	Ezel group*1 High-density recycled cotton*2 High-density rubber block*18 Granular rubber mat*2

# Insert weightlifting platform full rack 50

- The full rack 50 offers optional Standard and Compact versions post-selection to accommodate diverse venue requirements.
- The steel-reinforced wooden platform resists warping and deformation under prolonged heavy use.
- The one-piece rubber mat provides superior shock absorption and anti-slip stability.

Spec	
Material	Q235 steel, Recycled cotton, Rubber Wood boards
Surface	Powder coating
Outline frame	Square
Frame size	2460*1900mm
Inner frame size	2442.5*1060mm
Thickness	50mm
Contain	Ezel group*1 High-density recycled cotton*2 High-density rubber block*6 Granular rubber mat*2

Insert weightlifting platform half rack 100

LP6235

- The half-rack integrated weightlifting platform offers a more flexible solution, ideal for space-limited venues or areas requiring adaptable training configurations.

Spec	
Material	Q235 steel, Recycled cotton, Rubber Wood boards
Surface	Powder coating

## Precise Space Optimization: Create a unique fitness space

At Livepro, we understand that every fitness space is unique, so our service philosophy goes beyond mere design and customization. We believe that good space planning is the key to the success of a fitness facility. Our goal is to create a functional and aesthetically pleasing fitness environment with a streamlined set of equipment that makes sure every inch of space gets the most out of it.

### Precise planning - the perfect blend of function and aesthetics

Our team of experts will understand your needs in-depth and make precise planning based on the characteristics of your space. Our goal is to achieve the most comprehensive functionality with the least amount of equipment, ensuring that each piece of equipment is necessary, while maintaining the aesthetics and rational layout of the space.

### Scientific planning - the cornerstone of business success

We believe that through scientific planning and careful design, Your fitness space not only provides a superior member experience, but also boosts your business success. A well-planned, functional, and aesthetically pleasing fitness environment is key to attracting and retaining members.

We are committed to creating a fitness environment that is both functional and aesthetically pleasing through minimal equipment configuration and precise space planning. Help your brand grow and succeed commercially.

### Device minimization - maximum functionality

At Livepro, we adhere to the principle of "less is more". We've selected high-performance and versatile equipment to ensure they meet a wide range of training needs, save space, and make your fitness environment more spacious and comfortable.

### Personalized design - a unique brand experience

Through color selection and logo customization, we further strengthen your brand image. Our design team will ensure that these elements are closely linked to your brand philosophy and visual style, creating a unique and engaging fitness space.

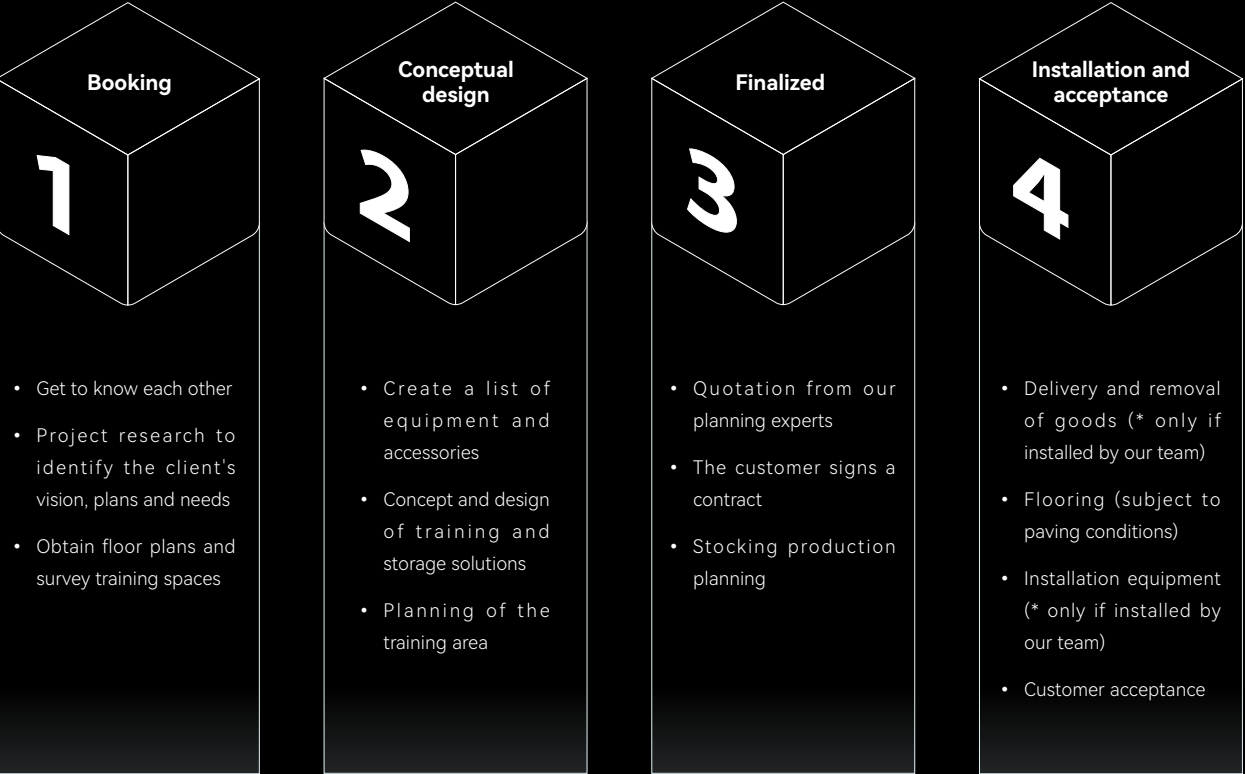

## Introduction to the project service process

We'll help you plan your training space.

Creating your own training space is a big step. We know that every project has special requirements. With more than 7 years of experience, our team of experts is at your service every step of the way. From conception to planning to fabrication and installation, we will work together to realize a fully equipped and modern training space based on your wishes and ideas.

## Elite Training: All-round growth plan

At Livepro, we are committed to providing comprehensive and professional sports training science training services. Through our carefully set up 1000 square meter training center and professional team of instructors, we provide our customers with an ideal platform for learning and Xi and growth.

We don't just impart knowledge, we are committed to cultivating the all-round training capabilities of our customers. Help them achieve excellence in their respective fields.

**Practice and theory combined**

In Livepro's training center, theoretical learning is closely integrated with practical Xi. We ensure that each participant is able to deepen their understanding in the real world and thus apply what they have learned more effectively in practice.

**Professional team of lecturers**  
**Transfer of knowledge and experience**

Our team of lecturers is made up of experienced professionals who have not only deep theoretical knowledge, but also a wealth of practical experience. This ensures that we are able to provide the most cutting-edge and practical knowledge of training science.

**Diversified training mode**  
**Flexible and efficient**

Our training services are not limited by geography and provide remote online training, on-site guidance, and professional training spaces at Livepro on-site training. No matter where you are in the world, you can benefit from our high-quality training services.

**Customized training programs Targeted**

We offer customized training programs for different sports and sports. Whether it's the military, police, commercial gyms, or specific sports programs, we can tailor the training program to the specific needs of our clients.

Personal  
trainer studio

For personal trainers, profitability is very important. There is often only a small area available, so it's important to choose a device that has more functionality in a smaller space.
